For the Health of Your Patients:

Vascular aging is characterised by progressive arterial stiffness, loss of arterial elasticity and arterial compliance from a myriad of structural and functional changes in the endothelium, vascular media and adventitia. VasculoSirt®'s revolutionary nutritional formula is designed to:

- Slow vascular aging
- Promote vascular and heart health
- Slow aging in experimental animals
- Provide support for healthy blood pressure, cholesterol, glucose and insulin levels within normal ranges
- Support sirtuin activity

For the Health of Your Practice:

Not only is VasculoSirt® one of the most comprehensive cardiovascular and antiaging supplements available, but each bottle of VasculoSirt® takes the place of up to 12 separate supplements, providing distinct cost and convenience advantages for your patients. Dr. Mark Houston, Associate Clinical Professor of Medicine at Vanderbilt Medical School and Director of Hypertension Institute and Vascular Biology in Nashville, in conjunction with Biotics Research Corporation developed VasculoSirt®, a state of the art nutritional supplement amalgamating the optimal nutrient levels used in a wide variety of clinical studies. In keeping with Biotics Research Corporation's dedication to providing superior leading-edge supplements, each serving of VasculoSirt® supplies 50 mg of Resveratrol (Trans-Resveratrol), 50 mg of R-Lipoic Acid, 250 mg of EGCG (Epigallocatechin Gallate), and 50 mg of Coenzyme Q10 (emulsified for increased uptake and utilisation), along with 23 other vitamins and nutrients that have been shown to support a wide variety of cardiovascular processes. VasculoSirt® was released for clinical use in August 2007 and is the first nutraceutical supplement designed to promote vascular and heart health, slow vascular aging, improve endothelial function and arterial compliance, support healthy blood pressure levels and possibly normalise atherosclerotic markers. Over the past 32 months, VasculoSirt® has been studied prospectively in well over 1,000 patients at the Hypertension Institute. Dr. Mark Houston has found that when VasculoSirt® is used with an optimal program of nutrition, exercise, and weight management, the following improvements in vascular health were typically noted: improved CAPWA, improved CIMT and carotid duplex, improved EBT, improved coronary arteriogram, improved ECHO, reduced vascular inflammation, reduced blood pressure, reduced homocysteine, improved energy and mental focus, improved exercise tolerance and conditioning, and improved nutrient analysis for related deficiencies. As always, you can count on Biotics Research Corporation to offer superior nutritional products supplying "The Best of Science and Nature".
