

# Super Vitamin B Complex With Co-enzyme B2 and B6

Super Vitamin B Complex is an advanced and complete B-vitamin supplement, formulated especially for those who require the least amount of allergens. It provides substantial amounts of all eleven B-vitamins, including the co-enzyme forms of vitamins B2 and B6 for enhanced bioavailability, and extra pantothenic acid for adrenal support.\* Instead of using vitamins derived from allergen-containing plant sources such as yeast or corn, the B vitamins in this formula are synthesized from hydrocarbons, which originate ultimately from living sources, with very low allergy potential.

#70340  
120 vegetarian capsules

## Key Features

- Formulated especially for those who require the least amount of allergens
- Includes the co-enzyme forms of vitamins B2 and B6 for enhanced bioavailability\*
- Also includes extra pantothenic acid for adrenal support\*
