## For the Health of Your Patients:

As a direct result of the Standard British Diet (SBD), gallbladder problems are rampant in modern society. Traditionally, many practitioners have supplemented those with gallbladder issues with products containing bile salts, such as Beta Plus™. While bile salts have helped a great number of patients support normal digestive processes, they do not benefit those patients without bile insufficiency. Some patients produce adequate levels of bile; however, the bile they produce is too thick and thus may result in biliary stasis.

Intolerances for fried or fatty meals, gas, bloating, constipation, post-prandial referred pain to the scapula, etc. are all functional signs that biliary function may be altered.

## For the Health of Your Practice:

For over 10 years, Beta-TCP™ has been the supplement of choice for practitioners supporting biliary motility. Each tablet of Beta-TCP™ supplies 100 mg of organic whole beet concentrate (a natural source of betaine) combined with pancreatic lipase, taurine, and vitamin C, as well as super oxide dismutase and catalase – two very important antioxidant enzymes. Conveniently dosed at 1 to 3 tablets per meal, Beta-TCP™ is available in bottles of 90 & 180 tablets. As always, you can count on Biotics Research Corporation to offer superior nutritional products supplying "The Best of Science and Nature".
