In response to increasing demand from our Practitioners, Biotics Research has implemented a new e-mail program to bring important, leading-edge information and literature to you, thereby helping facilitate the growth of your practice. Biotics Research products are available exclusively through Healthcare Providers.

Impacting auto-immunity via the inflammatory process - Covering the Basics!

Why do you need to address inflammation? With increasing frequency, more and more studies are associating inflammation and inflammatory processes with auto-immune and other unwanted health conditions. Numerous nutraceuticals have been demonstrated to influence the pathways involving inflammatory processes.

Optimal EFA's® - This product was strategically formulated with noted researcher and author, Dr. Alex Vasquez to provide an ideal balance of Omega 3, 6 and 9. They supply a unique blend of the highest quality fish, flaxseed, and borage oils, tested for purity, providing ALA, EPA, DHA, GLA, and Oleic acid in ratios that are optimal. Available as easy to take capsules or in a naturally flavoured liquid formula, Optimal EFA's® are available exclusively through Biotics Research Corporation.

Bio-D-Mulsion Forte® – Evidence suggests that vitamin D deficiency may also be particularly common among patients with inflammatory and autoimmune disorders, and that vitamin D may modulate inflammatory responses. Long recognised as the leader in vitamin D supplementation, Biotics Research Corporation has developed a proprietary system of utilising micro-emulsified cholecalciferol (vitamin D3) for enhanced absorption, which can be especially important for patients with malabsorption issues.

ProMulti-Plus® - Research has clearly demonstrated that diet alone may not supply nutrients in sufficient amounts necessary for overall good health. Many studies support the use of dietary supplementation to ensure adequate consumption of important nutrients. A growing number of doctors, researchers, and nutritional experts agree that supplementation is important to protect against common deficiencies, many of which have been linked to unwanted chronic conditions, and to provide support for optimal physical and mental wellness. ProMulti-Plus® supplies a complete array of antioxidant enzymes, as well as a wide variety of important synergists, such as trace minerals, natural mixed carotenoids, bioflavonoids, green tea extract, and BioPerine® in a convenient, easy-to-swallow capsule form.

BioDoph-7 Plus® - The modern dilemma is that allergies and chronic health conditions are on the rise. Antibacterial soaps, washes, and wipes, chronic dehydration, mercury amalgams, total toxin load, and nutrient deficient diets have become a scourge on friendly bacteria. Documented research has indicated important benefits associated with the use of probiotic bacteria, including improved digestion, enzymatic activity, and overall modulating effects on the immune system. BioDoph-7 Plus® contains a proprietary blend of 3 prebiotics and 7 probiotics extensively tested to ensure optimal colonisation with bacterial strains recognised for their bioactivity and each capsule contains 20 billion viable organisms at the time of manufacture.
