In response to increasing demand from our Practitioners, Biotics Research has implemented a new e-mail program to bring important, leading-edge information and literature to you, thereby helping facilitate the growth of your practice. Biotics Research products are available exclusively through Healthcare Providers.

Our featured supplement of the week is our esteemed Sirtuin line

What are Sirtuins? Sirtuins are a family of proteins found in all domains of life. Localised within the cell nucleus, they function in DNA repair and are considered to be regulators of cell defense systems. Of the 7 Sirtuins genes that have been classified in mammals, the one which has received the predominant share of study is Sirt1. Sirt1 has predominantly been linked to lifespan extension, however sirtuins have been associated with a variety of functions including: gene silencing, cell cycle regulation, fatty acid metabolism, apoptosis, metabolism cellular differentiation, as well as decreased adipocyte formation. Sirtuins also deacetylate transcription factors FOXOs, p53, and NFK β . Collectively, sirtuins have been demonstrated to mimic caloric restriction, extend lifespan, delay onset of age-related diseases, diminish insulin resistance, and enhance immune function.

Why choose Biotics Research Corporations' Sirtuin line of products for your patients? Our fine line of Sirtuin products were developed in conjunction with Dr. Mark Houston, MD, MCs, ABAAM, FACP, FAHA, Associate Clinical Professor of Medicine at Vanderbilt Medical School and Director of Hypertension Institute and Vascular Biology in Nashville, TN. Our 4 Sirtuin products combine state of the art research and clinical expertise, and make for easy adjuncts for the healthcare practitioner concerned with anti-aging and vascular health. The Sirtuin line includes:

VasculoSirt™ - A compilation of over a dozen leading, highly researched supplement components used to support healthy aging and cardiovascular health.

ResveraSirt-HP™ - High potency resveratrol with quercetin. Trans-Resveratrol has been shown to provide significant antioxidant protection, to be cardio-protective, to downregulate proinflammatory mediators, and to mimic caloric restriction and the benefits associated with it.

EFA-Sirt Supreme™ - A superior blend of essential fatty acids fortified with delta tocotrienol, designed to support cardiovascular health and optimal aging.

Lipid-Sirt™ - A blend of plant sterols, green tea extract, pantethine, delta-tocotrienol and Phytolens® designed to support healthy lipid levels.

Once again, Biotics Research Corporation brings you "The Best of Science and Nature".
