

LIPID REPLACEMENT THERAPY (LRT[®])

Reverses chronic fatigue

PRODUCT NAME

Containing NT Factor[®]

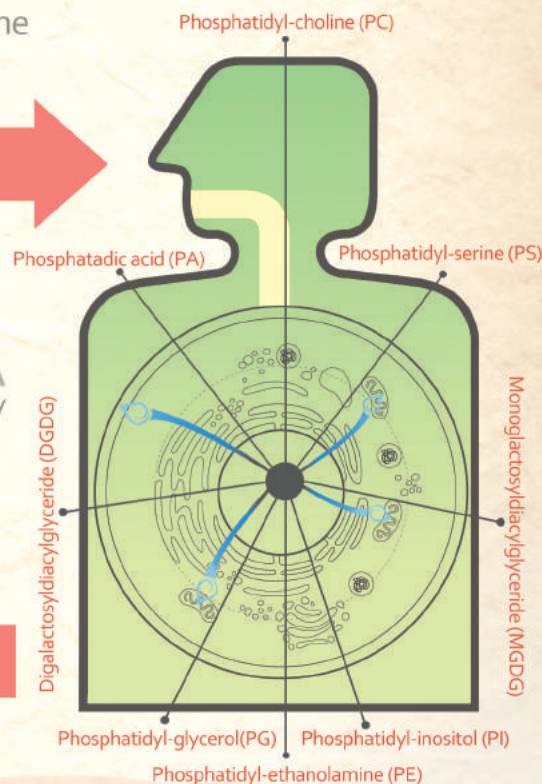

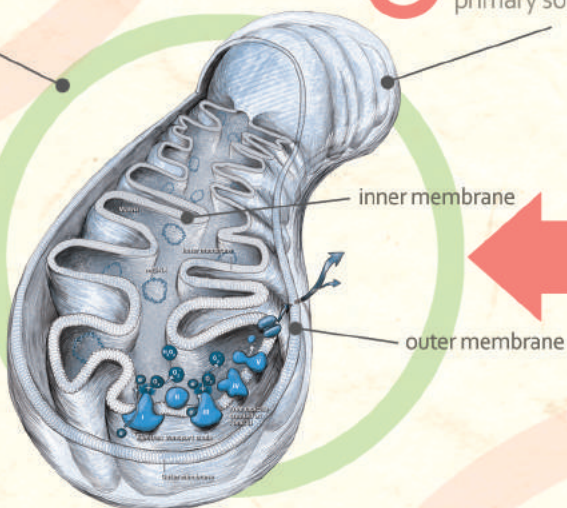

ORAL LRT[®]

LRT[®] is the provision of essential membrane lipids in the precise ratio found in all cell membranes.

NT Factor[®] - Developed by scientists

Spontaneous incorporation of LRT[®] ensures all cell membranes are repaired

MITOCHONDRIA
primary source of energy

“The integrity of mitochondrial membranes is critical to cell function and energy metabolism. This membrane is the frontier between cell survival and death.”

Fatigue resolution

- After eight weeks of using LRT[®] containing NT Factor[®]
- Both severe and moderate fatigue were reduced by 45%.
- LRT[®] has demonstrated consistent reduction in fatigue in multiple human studies using the validated Piper Fatigue Scale.
- No known toxicity or side effects.

45% Reduction in chronic fatigue

Average Age = 54
